DETAILED ACTION

Acknowledgement of Applicant's Amendments

1. Examiner acknowledges applicant's amendments to the claims and the remarks regarding these claims. These new claims and remarks are treated herein.

In addition, objections to the drawings are hereby withdrawn in view of applicant's amendment. Previous 35 USC 112 rejections are also withdrawn in view of the amendments to the claims. Previous claim objections are also withdrawn for this same reason.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 13-16, 18, 19, 20-22, 24, 25, 26-29, 31, 32, 33-35, 37, and 38 are drawn to a device and method constituting a multi-layered or stacked display, classified in class 345, subclass 5.
- II. Claims 17, 23, 30, and 36 are drawn to control of a backlight, classified in class 345, subclass 102.

3. Inventions of Group I and Group II are related as combination and subcombination, Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination

Art Unit: 2629

as claimed because Group 1 includes a multi-component display (or method) comprising a first and second screen that overlap arranged in a particular claimed arrangement. The subcombination has separate utility such as adjusting the brightness of a backlight based on a brightness value. The examiner has required restriction between combination and subcombination inventions. Where applicant elects a subcombination, and claims thereto are subsequently found allowable, and claim(s) depending from or otherwise requiring all the limitations of the allowable subcombination will be examined for patentability in accordance with 37 CFR 1.104. See MPEP § 821.04(a). Applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.
